Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 3662

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 29-56 are rejected under 35 U.S.C. 102(e) as being anticipated by Bodin (Pat. No. 6,122,512).

3. Bodin teaches a communication system and a method for estimating a distance between stations communicating in a communication system over a radio interface, the method comprising the steps: determining (col 8, line 1+) a first timing of a signal burst received from a transmitting station at a receiving station, the first timing being associated with the first component of the received signal burst that meets a predefined condition; determining (col 8, line 1+) a second timing of the received signal burst, the second timing being for use in adjustment of internal timing of the receiving station for communicating further signal bursts with the transmitting station; determining (col 3, lines 30+) timing delay information for the communication between the transmitting and receiving stations; and estimating (abstract) the distance between the transmitting and receiving stations based on the timing delay information and information about the first timing of the received signal burst.

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
